(ab) It is further certified that no amount was paid to your firm by this Project on account of GST

Consignee Unit

(vi) **Exemption of BST.** Tax Exemption Certificate for the purchases from Bhutanese Suppliers are applied through RAMIS, hence the Project shall apply for STEC online through RAMIS as and when the purchase is made. The required documents for applying exemption are as follows:-

- (aa) Duly filled ST form I.
- (ab) Letter of undertaking affixed with legal stamp and signed.
- (ac) Duly filled specimen signature from if applying for the first time.
- (ad) Copy of proforma invoice of the materials.

(b) **Force Majeure Clause.** Should any force majeure circumstance arise, each of the contracting party shall be excused for the non fulfillment or for the delayed fulfillment of any of its contractual obligations, if the affected party within **14 days** of its occurrence informs in a written form the other party. Force majeure shall mean fires, floods, natural disasters or other acts such as war, turmoil, strikes, sabotage explosions, and quarantine restriction beyond the control of either party. **In the event of either party being rendered unable by Force Majeure to perform any obligations required to be performed by them under the purchase order the relative obligations of the party affected by such force majeure shall upon notification to the other party be suspended for the period during which force majeure event lasts. The cost and loss sustained by the either party shall be borne by the respective parties. If the force majeure conditions persist for a period exceeding 90 days the Purchaser reserves the right to cancel the purchase order in full or in part.**

Consignee, Delivery & Delivery Period.

14. Supply of all **12 Nos Prefabricated Shelters** will have to be completed within **90 days of approval of pilot sample** from the date of effect of supply order. The stores are required to be delivered as per Appendix 'A' attached to this enquiry to the **consignee unit 504 SS&TC (GREF), Phuentsholing, Bhutan.** The responsibility for loading and unloading of stores including transit loss shall rest with the consignor. The firm who are unable to supply the desired items within original delivery period due to any reason and are contemplating/seeking extension of original delivery period must send their request by email giving detailed reason for seeking original delivery period extension and the request should reach seven clear working days before expiring of original delivery period failing which the supply order will be considered to be terminated and firm will be responsible for the same.

Contd---5/-

Part delivery of Pre-Fabricated Shelters (as specified in Appx 'A') will be accepted by the consignee. Following shall be submitted with each lot as specified herein:-

- (a) Ink signed copy of invoice in original
- (b) CRVs in duplicate
- (c) Guarantee/ warranty certificate
- (d) Purchase Vouchers
- (e) Test Certificates from Approval Govt lab (if applicable)
- (f) Copy of Performance Bank Guarantee
- (g) Prescribed pre-stamped bills in triplicate.
- (h) Manufactures test certificate.

Price Adjustment.

15. No adjustment in the rates after the date of opening of the quotation on account of any increase/decrease in the cost of input or on account of any statutory increase in any taxes or duty is admissible.

16. **Prices.** All the rates/prices mentioned in the purchase order shall remain firm throughout the delivery/ shipment of the goods/ performance of the services. Price escalation on any score whatsoever will NOT be entertained.

Manufacturer/Authorized Consignor /Distributor.

17. In case your firm is an original manufacturer of the product or an authorized consignor/ distributor, a certificate to this effect shall be enclosed alongwith product catalogue and company price list, Discount, if any offered thereon shall be specified clearly. If the product is proprietary in nature, certificate to this effect that the firm is sole manufacturer/ consignor /distributor of the product shall be enclosed with the offer.

Freight/ Warranty

18. **Freight.** Packaging and freight will be complete responsibility of the consignor. Damages/ losses in transit shall be the responsibility of the consignor upto the delivery location specified by the respective consignees. No defence vehicles will be provided to transport the stores. Stores will be securely packed without any additional cost to the Govt to avoid losses or damages during transit so as to reach this consignee, in perfect serviceable and fit for use condition. The consignor shall remain responsible for adequacy of packages during transit. The packages shall be marked with the Supply order and other necessary details for easy identification at the consignee's end. The consignor will be responsible for unloading at FOR and to ensure that the stores are delivered in sound condition without any damage.

19. **Warranty/Guarantee.** The stores supplied against the supply order shall bear a warranty against defective materials for a period of **Two years** or as specified by the company/ consignor/firm (whichever is higher) from the date of completion of the supply order. In case of manufacturing failure or defect in any component within the warranty period, the consignee shall inform the consignor for joint inspection. Within a period of one week of the receipt of such information, the rejected material shall be removed and replaced by the consignor at the site at his own expense and no extra payment shall be made on this account. All stores to be supplied should be free from all defects and faults in material workmanship and manufacture. They should be of the highest grade and consistent with the established and generally accepted standards for material of the type used and in full conformity with the specifications, drawings or samples and shall, if operable, operate properly. The Consignor shall be bound to furnish a clear written warranty regarding the same. In the event of the ultimate consignee in Bhutan not finding the stores in accordance with the order, the Consignor will be required to replace them free of cost inclusive of all freight and handling charges. Such replacement will be done within ninety days to the claim report raised by the Consignee. These standard conditions will also apply in respect of replaced stores.

TERMINATION OF PURCHASE ORDER

20. **Termination for Non-performance.** The Purchaser without prejudice to any other remedy for breach of purchase order, by giving a written notice for non-performance to the Seller/consignor, may terminate the purchase order in whole or in part for following reasons:-

- (a) When the supplier fails to honour any part of the supply order including failure to deliver the supply order stores/ render services in time.

- (b) When the contractor is found to have made any false or fraudulent declaration or statement to get the supply order or he is found to be indulging in unethical or unfair trade practices.
- (c) When both parties mutually agree to terminate the supply order.
- (d) When the item offered by the supplier repeatedly fails in the inspection and/or the supplier is not in a position to either rectify the defects or offer items conforming to the stores quality standards.
- (e) Any special circumstances, which must be recorded to justify the cancellation or termination of a supply order.
- (f) If the Seller/ consignor, in the either of the above condition, does not cure his failure within a stipulated period of 30 days (or such a longer period may authorize by the Purchaser in writing) after receipt of notice of non-performance form the Purchaser.

Contact Address.

21. For any further information/clarification on the subject the following Officer may be contacted during the office hours (i.e. 0830 Hrs to 1700 Hrs BST except Sunday/Holidays):-

Staff Officer-I (Resources)
Headquarters
Chief Engineer
Project Dantak
Tele No .009752351082/86/88
e-mail : bro-dtk@nic.in

22. The accepting officer does not bind himself to accept the lowest quotation or any other quotation and reserves the right to accept or reject any of the quotation either in part or in full without assigning any reasons what so ever thereto.

23. No purchase against this enquiry is guaranteed.

24. The quantities of stores given is/are guidelines and may be decreased minus (-)10% according to our requirement at the time of placing of supply order.

25. Quotation received after the expiry of time and date specified in **Para 02** above will not be entertained.

26. **Delivery & Payment Clause.** Delivery schedule of 12 Nos shelters will be completed in three lots within the time period as mentioned below. In case of delivery not being made in under mentioned given schedule, LD clause as per Para 29 will be applicable on the firm. Part payment as per details given below (excluding compulsory deductibles) will be paid to the consigner after successes full delivery of each lot (refer Para 14). Reference is made to Rule 172 (2) of the General Financial Rules (GFR) 2017. A total of 76% of the Supply Order amount will be released on successful delivery of stores as per details given below. Balance 24% of accepted supply order amount will be paid in stages i.e 2% after erection of each shelters. The payment shall be made as per the following:-

Ser No	Details	Lot No	Part payment on completion of supply & acceptance of same by CFA/ BOO	Supply to be completed by
(a)	Completed a supply of Four numbers of Prefabricated Shelters	1- (One)	25 %	Within 45 days of approval of pilot sample
(b)	Completed a supply of Four numbers of Prefabricated Shelters	2 (Two)	25 %	Within 65 days of approval of pilot sample
(c)	Completed a supply of Four numbers of Prefabricated Shelters	3 (Three)	26 %	Within 90 days of approval of pilot sample
(d)	Erection of shelters	-	24% (2% on erection of each shelter)	-

Appendix 'E'PERFORMANCE BANK GUARANTEE FORMATHQ CE (P) Dantak ENQ No 30003/DTK/19TF/ENQ- 52 /E3ES dt 4 Mar 2024**From:****Bank** _____

To,

.....
.....
.....
.....

Dear Sir,

1. Whereas you have entered into a supply order No 30003/DTK/19TF/SO- /E3ES dated ____/ /2024(hereinafter referred to as the said supply order) with _____, hereinafter referred to as the "seller/consignor" for supply of goods as per Part-II of the said supply order to the said seller/consignor and where as the Seller/consignor has undertaken to produce a bank guarantee for(5%) of total supply order value amounting to _____ to secure its obligations to the HQ CE (P) Dantak. We the _____ bank hereby expressly, irrevocably and unreserved undertake and guarantee as principal obligors on behalf of the seller/consignor that, in the event that the HQ CE (P) Dantak declares to us that the goods have not been supplied according to the performance obligations under the aforementioned supply order, we will pay you, on demand and without demur, all and any sum up to a maximum of _____(Rupees _____ only). Your written demand shall be conclusive evidence to us that such repayment is due under the terms of the said supply order. We undertake to effect payment upon receipt of such written demand.

2. We shall not be discharged or released from this undertaking and guarantee by any arrangements, variations made between you and the Seller/consignor, indulgence to the Seller/consignor by you, or by any alterations in the obligations of the Seller/consignor or by any forbearance whether as to payment, time performance or other wise.

3. In no case shall the amount of this guarantee be increased.

4. This guarantee shall remain valid for months from the date of acceptance of consignment in India/Bhutan or until all the store, spares and documentation have been supplied according to the performance obligations under the said supply order at the destination FOR.

5. Unless a demand or claim under this guarantee is made on us in writing or on before the aforesaid expiry date as provided in the above referred supply order or unless this guarantee is extended by us, all your rights under this guarantee shall be forfeited and we shall be discharged from the liabilities hereunder.

6. This guarantee shall be a continuing guarantee and shall not be discharged by and change in the constitution of the Bank or in the constitution of M/s _____.

Appendix 'F'**FORMAT OF CERTIFICATE OF ACCEPTANCE****HQ CE (P) Dantak ENQ No 30003/DTK/19TF/ENQ- 52 /E3ES dt 4 Mar 2024****CERTIFICATE OF ACCEPTANCE**

1. Certified that the M/s _____, hereby accepts the supply order No 30003/DTK/19TF/SO- _____/E3ES dated ____/____/2024 of the against enquiry No 30003/DTK/19TF/ENQ- 52 /E3ES dated 04/03/2024 as per the supply order assigned to them and handed over the same to HQ CE (P) Dantak at _____ hours, on this _____ day of the month _____ in the year two thousand and Twenty Four.
2. The list of liabilities as on date is placed at annexure to this certificate.
3. Signed on _____ Day of _____ Two Thousand and Twenty Four.

Annex I

DETAILED TECH SPECIFICATION FOR PRE FABRICATED SHED SIZE
14.64 M X 4.88 M X 2.74 M WITHOUT VERANDAH WITH FALSE CEILING
(LAYOUT PLAN - ANNEXURE I)

GENERIC

Type of PREFAB Hut/House	With partition wall
Pre-fabricated huts having	With partition wall ^{w/o} with verandah, (i) Doors D1 – 0.915 m x 2.08 m - 02 Nos (ii) Windows W – 1.22 m x 1.22 m - 08 Nos (iii) fabricated steel trusses, purlins and vertical column – As per DGS&D drawing No. 113 (Version 2003) and false ceiling of each sheet.
Roof Type of Prefab Hut/ House	Roof of corrugated preprinted galvanized steel sheet.
Pre-fabricated Huts to be manufactured by using	Double skin insulated flat cement sheet/board (asbestos fiber) panels for wall and GCI sheet roof.
Scope of supply (Offer price to include all cost components)	Supply, Installation, Testing and commissioning of Huts/House.
Transportations/Freight Charges	Offr Prices are on Free delivery at consignee site basis.
approval of Advance sample before Bulk Supply	After award of contract seller shall gave to get Advance sample approved from Buyer before manufacturing/starting Bulk supplies. Buyer shall approved/provide list of modification required within 10 days of offer of advance sample. If there is delay in approval of advance sample from buyer side, the delivery period shall be regularized for the period of delay in sample approval.
Foundation for Prefab Hut	Building of foundation at site shall be the responsibility of the consignee and the seller shall install/Erect and Commission the structure on the foundation constructed upto plinth level by the Consignee.
Time period for completion of erection work at site by seller	Within 45 days of the date of receipt of consignee/s confirmation regarding completion of ground and foundation work.
Suitability/Structural Stability/Completeness of Structures, the structure is intended for use in	In wind conditions of 55 m/s, in seismic zone V and ambient temperature of -5 degree c to 50 degree C considering snow load of 6 inches. Huts should be structurally stable and suitable to meet severity of these climatic condition.
Type of glass fitted on windows/Ventilators	Pin head type, Plain
<u>DESIGN/MATERIAL OF WALL PANELS</u>	
Design of wall panel	As per GeM DRG. No. 121 & 123 (Version-2015)
Wall made in sandwich panel system using 2 Numbers 10 mm thick cement flat sheets/ boards (Asbestos free) as skin conforming to	IS 14276 Latest as amended uptodate, category 3 Type B of IS 14862: 2000 latest as amended up to date.

Handwritten mark

Sandwich material-27 mm gap in between all skins to be filled with

27 mm thick expanded polystyrene core having bulk density of 15 kg/cum conforming to IS 4671 : 1984 type I (Latest)

Panel strengthened on all four sides

By 'W' shaped pre-profiled steel section made from 0.63 GI steel sheet/Coil.

Cement sheet and expanded polystyrene core to be bonded together using bonding material

PVA (Polyvinyl acetate) based conforming to IS 4835/Latest, uniformly & fully applied on both sides of the expanded polystyrene cores to ensure proper bonding of the panels. No patching of adhesive will be accepted.

'U' shaped ground/track size (panels to be inserted on by one)

52 mm X 35 mm X 1.25 mm made from GI steel sheet/coil.

Bottom track to be fixed

To the concrete platform at plinth level by suitable fasteners screwed into PVC Expandable screw cap

Interlocking of wall panel (lengthwise)

Using cold formed rectangular hollow steel section of size 50mm X 25 mm X 1.25 mm

Wall corners to be concealed

With corner angle of 125mm X 125 mm X 125mm made from GI steel sheet/coil

Top of walls to be concealed

With 'U' shaped top track of size 52.5 mm X35 mm X 1.25 mm made from GI steel sheet/coil

Sellers are free to adopt higher sizes/reinforcement

For better fitment of mating of components or for improved stability

FALSE CEILING

Design of false ceiling

As per GeM DRG No 127 (Version-2015)

False ceiling of size 610 mm X 1220 mm made of one number cement flat board (6mm thick-asbestos free) bonded with expanded polystyrene core (32 mm thick having bulk density of 15 kg/ cum conforming to IS 4671/Latest cement flat board conforming to

IS 12476/Latest, category 3 type B of IS 14862/Latest

Roof Cement sheet and expanded polystyrene core to be bonded together using bonding material

PVA (Polyvinyl acetate) based conforming to IS 4835/Latest, uniformly & fully applied on both sides of the expanded polystyrene cores to ensure proper bonding of the panels. No patching of adhesive will be accepted.

False ceiling panels to be placed on suspended grid frame of sides

610 mm X 1220 mm made from GI "L" & "T" sections of 0.63 mm conforming to IS 277/Latest having min. GSM of 120 gms.

False ceiling grid to be Suspended from the roof Frame work with the help of galvanized wire of id (Minimum) Finished clear Height of false ceiling Water proofness of false ceiling panels

3 mm

2740 mm

To be properly packed with polythene sheets

ROOF & ROOF FRAME WORK

Design for roof

As per GeM DRG. No. 119 (Version-2015)

Wall height at eaves and central gable

2750mm at eaves and 3360 mm at central gable

Roof to be done with

Galvanised corrugated sheets of 0.63 mm thickness conforming to IS 277/ Latest having min.275 gsm galvanizing ,corrugated prepainted galvanized steel sheets and prepainted galvanized steel sheet ridge cover with thickness of BMT 0.63 mm conforming to IS 1426/Latest. Top coat of sheet shall be PVDE/Silicon modified Polyester having thickness of 20 micro (Min) and Back coat shall be of Alkaloid epoxy or polyester having thickness of 7 micron (Min). A protection sheet (Polyethylene) shall also be provided on top coat of the sheet for transport. The durability of paint coating shall correspond to class 1 as per table-1 of IS : 14246:2013. (Colour shade of exterior finish shall be olive Green of colour code RAL6028. The seller shall furnish manufacture's test certificate indicating material of coating and suitability of exterior application.

Roof to be laid over

Frame work of trusses-columns and purlins fixed using Self tapping screws with rubber washer.

Size of Ridge cover to be fixed on top junction of roof of same material as Roof.

225 X225 X 0.63 mm

Roof slope

1:4 (appeox)

Purlin to be provided on the roof

Of size 66 X 33X 2.9 mm at the eaves and at gable roof extension (out side the structure)

Roof projection in case on no verandah (In front)

Min. 400 mm from the eaves wall and 300 mm from gable walls.

Roof projection

As per GeM DRG No.109 & 119 (Version-2015)

Purlin provided on the trusses

At a max pitch of 1000 mm or less and are fixed and flushed with the top level of trusses with the hilp off 5 mm thick MS end plates and 10 mm nuts/bolts.

Column to be welded

With 5mm thick MS end plate and to be fixed to the foundation bolts through this plate.

Trusses/purlins to be Fixed

Using 5mm thick MS end plates and 10 mm nuts and bolts

Trusses (Supported on truss column) provided at a distance of

2440 mm

Trusses and Purlin to be made of

Rectangular hollow sections of size 66 X 33 X 2.9 mm conforming to IS 4923/Latest duly ISI marked.

Truss columns to be made of

Rectangular hollow steel sections of size 96 X 48 X 3.2 mm conforming to IS 4923/Latest duly ISI marked.

Roof structural frame work

As pe GeM DRG. No.119-120a-120b &121 (Version -2015)

2

VERANDAH & DOORS

Width of verandah	1525 mm
Clear height of verandah	2280 mm
Verandah roof to be made of	GI (Continues provided along the roof of the structure)
Purlin provided to verandah Structure	To be made of rectangular hollow steel sections of size 66 X 33 X 2.9 mm and are fixed and flushed with the top level of the truss extension member with the help of 5 mm thick MS end plates and 10 mm nut/bolts.
Verandah columns to be made of	Rectangular hollow steel sections of size 66 X 33 X 2.9 mm and are fixed and flushed with the top level of the truss extension member with the help of 5 mm thick MS end plates and 10mm nut/bolts.
Door frame to be made from	Pressed steel four sided from using CR steel of size 75 X 45 X 1.5 mm thickness confmg. To ISI 513/latest.
Door Hinges	4nos 100mm MS hinges welded on to the frame
Door shutter made of	30 mm thick flush door confmg to IS 2202 (Part-1)/latest.
Door shutter to be fixed with	Door frame with 4nos MS oxidized hinges of 100mm length
Door aldrops	To be provided 2 nos. MS oxidized of 300mm length
Door tower bolts	MS oxidized of size 200mm at top and 100 mm at bottom on each shutter
Door handles	2 nos. 150 mm long handles

WINDOWS & VENTILATORS

Windows	As per GeM DRG No.125 (VERSION-2015)
Ventilators	As per GeM DRG No. 126 (VERSION-2015)
Frame material of windows/ventilators	Made from pressed steel using CR steel of size 75 X 45 X 1.5mm (thickness) conforming to IS 513/Latest
Hinges for windows	6 Nos. 75mm MS butt hinges welded on the frame
Hinges for ventilators	2 Nos 75 mm MS butt hinges welded on to the frame
Grills/windows/Ventilators	Made from MS square bar of 8 mm having equal spacing of 125 mm.
Shutter material for windows/Ventilators	Made out of steel rectangular hollow box profile of 1.25mm thick as per drawing ,fabricated type.
Each window shutter consist of	MS oxidized handle of 150 mm-2 Nos.MS oxidized tower bulls of 100mm and 1 No window stay.
Each ventilator shutter (Internal) consist of	1 No stay hook

2

Glass sheet for
windows/ventilators

Of 4mm thickness to be fixed using glass putty

9.76 M X 6.10 M X 2.74M WITH FALSE CEILING AND 1.525 M VERANDAH
(LAYOUT PLAN - ANNEXURE- III)**

GENERIC

Type of PREFAB Hut/House	With partition wall
Pre-fabricated huts having	With partition wall with verandah, (i) Doors D1 – 0.915 m x 2.08 m - 04 Nos (ii) Doors D2 - 0.75 m x 2.08 m – 04 Nos (iii) Windows W – 1.22 m x 1.22 m - 08 Nos (iv) fabricated steel trusses, purlins and vertical column – As per DGS&D drawing No. 118 (Version – 2015) and false ceiling of each sheet.
Roof Type of Prefab Hut/ House	Roof of corrugated preprinted galvanized steel sheet.
Pre-fabricated Huts to be manufactured by using	Double skin insulated flat cement sheet/board (asbestos fiber) panels for wall and GCI sheet roof.
Scope of supply (Offer price to include all cost components)	Supply, Installation, Testing and commissioning of Huts/House.
Transportations/Freight Charges	Offer Prices are on Free delivery at consignee site basis.
approval of Advance sample before Bulk Supply	After award of contract seller shall give to get Advance sample approved from Buyer before manufacturing/starting Bulk supplies. Buyer shall approved/provide list of modification required within 10 days of offer of advance sample. If there is delay in approval of advance sample from buyer side, the delivery period shall be regularized for the period of delay in sample approval.
Foundation for Prefab Hut	Building of foundation at site shall be the responsibility of the consignee and the seller shall install/Erect and Commission the structure on the foundation constructed upto plinth level by the Consignee.
Time period for completion of erection work at site by seller	Within 45 days of the date of receipt of consignee/s confirmation regarding completion of ground and foundation work.
Suitability/Structural Stability/Completeness of Structures, the structure is intended for use in	In wind conditions of 55 m/s, in seismic zone V and ambient temperature of -5 degree c to 50 degree C considering snow load of 6 inches. Huts should be structurally stable and suitable to meet severity of these climatic condition.
Type of glass fitted on windows/Ventilators	Pin head type, Plain

DESIGN/MATERIAL OF WALL PANELS

Design of wall panel

Wall made in sandwich panel system using 2 Numbers 10 mm thick cement flat sheets/ boards (Asbestos free) as skin conforming to

As per GeM DRG. No. 121 & 123 (Version-2015)

IS 14276 Latest as amended upto date, category 3 Type B of IS 14862: 2000 latest as amended up to date.

D

Sandwich material-27 mm gap in between wall skins to be filled with	27 mm thick expanded polystyrene core having bulk density of 15 kg/cum conforming to IS 4671 : 1984 type I (Latest) By 'W' shaped pre-profiled steel section made from 0.63 GI steel sheet/Coil.
Panel strengthened on all four sides	
Cement sheet and expanded polystyrene core to be bonded together using bonding material	PVA (Polyvinyl acetate) based conforming to IS 4835/Latest, uniformly & fully applied on both sides of the expanded polystyrene cores to ensure proper bonding of the panels. No patching of adhesive will be accepted.
'U' shaped ground/track size (panels to be inserted on by one)	52 mm X 35 mm X 1.25 mm made from GI steel sheet/coil.
Bottom track to be fixed	To the concrete platform at plinth level by suitable fasteners screwed into PVC Expandable screw cap
Interlocking of wall panel (lengthwise)	Using cold formed rectangular hollow steel section of size 50mm X 25 mm X 1.25 mm
Wall comers to be concealed	With corner angle of 125mm X 125 mm X 125mm made from GI steel sheet/coil
Top of walls to be concealed	With 'U' shaped top track of size 52.5 mm X35 mm X 1.25 mm made from GI steel sheet/coil
Sellers are free to adopt higher sizes/reinforcement	For better fitment of mating of components or for improved stability
<u>FALSE CEILING</u>	
Design of false ceiling	As per GeM DRG No 127 (Version-2015)
False ceiling of size 610 mm X 1220 mm made of one number cement flat board (6mm thick-asbestos free) bonded with expanded polystyrene core (32 mm thick having bulk density of 15 kg/ cum conforming to IS 4671/Latest cement flat board conforming to	IS 12476/Latest, category 3 type B of IS 14862/Latest
Roof Cement sheet and expanded polystyrene core to be bonded together using bonding material	PVA (Polyvinyl acetate) based conforming to IS 4835/Latest, uniformly & fully applied on both sides of the expanded polystyrene cores to ensure proper bonding of the panels. No patching of adhesive will be accepted.
False ceiling panels to be placed on suspended grid frame of sides	610 mm X 1220 mm made from GI "L" & "T" sections of 0.63 mm conforming to IS 277/Latest having min. GSM of 120 gms.
False ceiling grid to be Suspended from the roof Frame work with the help of galvanized wire of id (Minimum)	3 mm
Finished clear Height of false ceiling	2740 mm
Water proofness of false ceiling panels	To be properly packed with polythene sheets

Using 5mm thick MS end plates and 10 mm nuts and bolts

Trusses (Supported on truss column) provided at a distance of
Trusses and Purlin to be made of

2440 mm

Rectangular hollow sections of size 66 X 33 X 2.9 mm conforming to IS 4923/Latest duly ISI marked.

Truss columns to be made of

Rectangular hollow steel sections of size 96 X 48 X 3.2 mm conforming to IS 4923/Latest duly ISI marked.

Roof structural frame work

As pe GeM DRG. No.119-120a-120b &121 (Version -2015)

A

VERANDAH & DOORS

Width of verandah	1525 mm
Clear height of verandah	2280 mm
Verandah roof to be made of	GI (Continues provided along the roof of the structure)
Purlin provided to verandah Structure	To be made of rectangular hollow steel sections of size 66 X 33 X 2.9 mm and are fixed and flushed with the top level of the truss extension member with the help of 5 mm thick MS end plates and 10 mm nut/bolts.
Verandah columns to be made of	Rectangular hollow steel sections of size 66 X 33 X 2.9 mm and are fixed and flushed with the top level of the truss extension member with the help of 5 mm thick MS end plates and 10mm nut/bolts.
Door frame to be made from	Pressed steel four sided from using CR steel of size 75 X 45 X 1.5 mm thickness confmg. To ISI 513/latest.
Door Hinges	4nos 100mm MS hinges welded on to the frame
Door shutter made of	30 mm thick flush door confmg to IS 2202 (Part-1)/latest.
Door shutter to be fixed with	Door frame with 4nos MS oxidized hinges of 100mm length
Door aldrops	To be provided 2 nos. MS oxidized of 300mm length
Door tower bolts	MS oxidized of size 200mm at top and 100 mm at bottom on each shutter
Door handles	2 nos. 150 mm long handles

WINDOWS & VENTILATORS

Windows	As per GeM DRG No.125 (VERSION-2015)
Ventilators	As per GeM DRG No. 126 (VERSION-2015)
Frame material of windows/ventilators	Made from pressed steel using CR steel of size 75 X 45 X 1.5mm (thickness) conforming to IS 513/Latest
Hinges for windows	6 Nos. 75mm MS butt hinges welded on the frame
Hinges for ventilators	2 Nos 75 mm MS butt hinges welded on to the frame
Grills/windows/Ventilators	Made from MS square bar of 8 mm having equal spacing of 125 mm.
Shutter material for windows/Ventilators	Made out of steel rectangular hollow box profile of 1.25mm thick as per drawing ,fabricated type.
Each window shutter consist of	MS oxidized handle of 150 mm-2 Nos.MS oxidized tower bulls of 100mm and 1 No window stay.
Each ventilator shutter (Internal) consist of	1 No stay hook

D

Glass sheet for windows/ventilators

Of 4mm thickness to be fixed using glass putty ^{APEX G} - ^{Amma} V

COLOUR & FINISH

MS Steel members

To be supplied with one coat of red oxide primer coating.

**DETAILED TCH SPECIFICATION FOR PRE FABRICATED SHED SIZE
19.52M X 6.1 M WITH FALSE CEILING AND 1.525M VERANDAH**

Appx 'G'
Annx VI

GENERIC

Type of PREFAB Hut/House	With partition wall as per Annx -VI
Pre-fabricated huts having	With partition wall with verandah 02 Doors, 08 windows 07 fabricated steel trusses, 88 purlins vertical column 09 and false ceiling of each sheet.
Roof Type of Prefab Hut/ House	Roof of corrugated preprinted galvanized steel sheet.
Pre-fabricated Huts to be manufactured by using	Double skin insulated flat cement sheet/board (asbestos fiber) panels for wall and GCI sheet roof.
Scope of supply (Offer price to include all cost components)	Supply, Installation, Testing and commissioning of Huts/House.
Transportations/Freight Charges	Offr Prices are on Free dælivery at consignee site basis.
approval of Advance sample before Bulk Supply	After award of contract seller shall gave to get Advance sample approved from Buyer before manufacturing/starting Bulk supplies. Buyer shall approved/provide list of modification required within 10 days of offer of advance sample. If there is delay in approval of advance sample from buyer side, the delivery period shall be regularized for the period of delay in sample approval.
Foundation for Prefab Hut	Building of foundation at site shall be the responsibility of the consignee and the seller shall install/Erect and Commission the structure on the foundation constructed upto plinth level by the Consignee.
Time period for completion of erection work at site by seller	Within 45 days of the date of receipt of consignee/s confirmation regarding completion of ground and foundation work.
Suitability/Structural Stability/Completeness of Structures, the structure is intended for use in	In wind conditions of 55 m/s, in seismic zone V and ambient temperature of -5 degree c to 50 degree C considering snow load of 6 inches. Huts should be structurally stable and suitable to meet severity of these climatic condition.
Type of glass fitted on windows/Ventilators	Pin head type, Plain

DESIGN/MATERIAL OF WALL PANELS

Design of wall panel	As per GeM DRG. No. <u>118</u> (Version-2003)
Wall made in sandwich panel system using 2 Numbers 10 mm thick cement flat sheets/ boards (Asbestos free) as skin conforming to	IS 14276 Latest as amended uptodate, category 3 Type B of IS 14862: 2000 latest as amended up to date.
Sandwich material-27 mm gap in between wall skins to be filled with	27 mm thick expanded polystyrene core having bulk density of 15 kg/cum conforming to IS 4671: 1984 type I (Latest)
Panel strengthened on all four sides	By 'W' shaped pre-profiled steel section made from 0.63 GI steel sheet/Coil.

Sh

Cement sheet and expanded polystyrene core to be bonded together using bonding material

PVA (Polyvinyl acetate) based conforming to IS 4835/Latest, uniformly & fully applied on both sides of the expanded polystyrene cores to ensure proper bonding of the panels. No patching of adhesive will be accepted.

'U' shaped ground/track size (panels to be inserted on by one)

52 mm X 35 mm X 1.25 mm made from GI steel sheet/coil.

Bottom track to be fixed

To the concrete platform at plinth level by suitable fasteners screwed into PVC Expandable screw cap

Interlocking of wall panel (lengthwise)

Using cold formed rectangular hollow steel section of size 50mm X 25 mm X 1.25 mm

Wall corners to be concealed

With corner angle of 125mm X 125 mm X 125mm made from GI steel sheet/coil

Top of walls to be concealed

With 'U' shaped top track of size 52.5 mm X 35 mm X 1.25 mm made from GI steel sheet/coil

Sellers are free to adopt higher sizes/reinforcement

For better fitment of mating of components or for improved stability

FALSE CEILING

Design of false ceiling

As per GeM DRG No. 118 (Version-2003)

False ceiling of size 610 mm X 1220 mm made of one number cement flat board (6mm thick-asbestos free) bonded with expanded polystyrene core (32 mm thick having bulk density of 15 kg/ cum conforming to IS 4671/Latest cement flat board conforming to

IS 12476/Latest, category 3 type B of IS 14862/Latest

Roof Cement sheet and expanded polystyrene core to be bonded together using bonding material

PVA (Polyvinyl acetate) based conforming to IS 4835/Latest, uniformly & fully applied on both sides of the expanded polystyrene cores to ensure proper bonding of the panels. No patching of adhesive will be accepted.

False ceiling panels to be placed on suspended grid frame of sides

610 mm X 1220 mm made from GI "L" & "T" sections of 0.63 mm conforming to IS 277/Latest having min. GSM of 120 gms.

False ceiling grid to be Suspended from the roof Frame work with the help of galvanized wire of id (Minimum) Finished clear Height of false ceiling Water proofness of false ceiling panels

3 mm

2740 mm

To be properly packed with polythene sheets

ROOF & ROOF FRAME WORK

Design fo roof

As per GeM DRG. No. 118 (Version-2003)

Wall height at eaves and central gable

2750mm at eaves and 3360 mm at central gable

Roof to be done with

Galvanised corrugated sheets of 0.63 mm thickness conforming to IS 2777/Latest having min.275 gsm galvanizing ,corrugated prepainted galvanized steel sheets and prepainted galvanized steel sheet ridge cover with thickness of BMT 0.63 mm conforming to IS 1426/Latest. Top coat of sheet shall be PVDE/Sillicon modified Polyester having thickness of 20 micro (Min) and Back coat shall be of Alkaloid epoxy or polyester having thickness of 7 micron (Min). A protection sheet (Polyethylene) shall also be provided on top coat of the sheet for transport. The durability of paint coating shall correspond to class 1 as per table-1 of IS : 14246:2013. (Colour shade of exterior finish shall be olive Green of colour code RAL6028. The seller shall furnish manufacture's test certificate indicating material of coating and suitability of exterior application.

Roof to be laid over

Frame work of trusses-columns and purlins fixed using Self tapping screws with rubber washer.

Size of Ridge cover to be fixed on top junction of roof of same material as Roof.

225 X225 X 0.63 mm

Roof slope

1:4 (appeox)

Purlin to be provided on the roof

Of size 66 X 33X 2.9 mm at the eaves and at gable roof extension (out side the structure)

Roof projection in case on no verandah (In front)

Min. 400 mm from the eaves wall and 300 mm from gable walls.

Roof projection

As per GeM DRG No. 118 (Version-2003)

Purlin provided on the trusses

At a max pitch of 1000 mm or less and are fixed and flushed with the top level of trusses with the hilp off 5 mm thick MS end plates and 10 mm nuts/bolts.

Column to be welded

With 5mm thick MS end plate and to be fixed to the foundation bolts through this plate.

Trusses/purlins to be Fixed

Using 5mm thick MS end plates and 10 mm nuts and bolts

Trusses (Supported on truss column) provided at a distance of

2440 mm

Trusses and Purlin to be made of

Rectangular hollow sections of size 66 X 33 X 2.9 mm conforming to IS 4923/Latest duly ISI marked.

Truss columns to be made of

Rectangular hollow steel sections of size 96 X 48 X 3.2 mm conforming to IS 4923/Latest duly ISI marked.

Roof structural frame work

As pe GeM DRG. No. 118 (Version-2003)
